

## Extended Response Questions

### STD

Write an editorial for your school newspaper convincing other students to get screened if they think that they have been exposed to an STD. Be persuasive and include signs and symptoms of STDs and specific steps that students can take to get screened. Also, include the physical, social and psychological benefits of getting screened.

### Hepatitis

Rasheed has been asked to find information on how people become infected with hepatitis and how hepatitis attacks the body once it enters. Describe people Rasheed could talk to or places he could go to get information about hepatitis. Include in your response a discussion on how people become infected with hepatitis and how hepatitis attacks the body. Also, include a discussion of why each person and place you identified is a good source of information.

### HIV

Chris and Pat are talking about HIV. Chris decides that Pat has many misconceptions about the transmission of this disease. Chris decides to set Pat straight about HIV in a way that will persuade him not to engage in risky behaviors. Write a letter from Chris to Pat in which Chris describes ways HIV is transmitted and ways Pat can reduce his risk of contracting HIV. Also, include people or places Pat can go to for more information or advice on HIV prevention and the kind of information or advice each person or place can give.
